## DETAILED ACTION

### *Election/Restrictions*

Claims 1-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 17 August 2005.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Nanataki et al. (US 6,246,843).

Nanataki et al. disclose an image forming apparatus including a heater (1) including a conductive member (7); a coil (4) arranged adjacent to the heater. Figure 22 shows a coil (18, 20, 21), which along with resonance capacitors (204, 205), is a resonance circuit.

Switching element (201) is a first switching element for exciting the resonance circuit. Waveform arrangement (66) is an oscillator outputting on/off signals for driving on and off the first switching element (201), and forms, along with CPU (55), a control circuit controlling at least the oscillator. Control timer circuits (58, 63, 217) are a second switching element forming a conduction path for driving the first switching element (201), and the control circuit (55) drives on and off the second switching element.

***Allowable Subject Matter***

Claims 6-10 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are considered patentable because of the inclusion of the claim limitations, an oscillator outputting on/off signals for driving a second switching element that forms a conduction path for driving a thermostat and a first switching element for exciting a resonance circuit of a fixing apparatus, that is not taught by or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kikuchi et al. (US 6,724,999) disclose a fixing apparatus having two thermostats and a coil driven by a transistor switching element.
